

Serhii Andriievskiyi

Frontend Engineer

serhii.dev.contact@gmail.com | [@Sergiucs](#) | Portfolio

Klaipėda, Lithuania • Originally from Kherson, Ukraine

SUMMARY

Frontend Developer (1+ years exp)

I build responsive and accessible web interfaces using TypeScript and Next.js. My focus is on writing clean, maintainable code and implementing pixel-perfect UI components based on modern design standards.

My Technical Focus:

I publish technical posts in my portfolio. One of my latest articles breaks down React ecosystem

WORK EXPERIENCE

FullStack Engineer at **WATOP** ([watop.app](#))

2025 – 2026

Project: Bakery E-commerce Platform

Achievements:

- **Email Verification:** Implemented the transactional email verification.
- **Security:** Engineered a robust JWT-based authentication infrastructure.
- **Geocoding Integration:** Implemented Google Places API for intelligent address autocomplete.
- **Checkout Logic:** Developed a multi-step checkout funnel with real-time validation, which improved user flow.
- **Caching:** Implemented a caching strategy to synchronize server-rendered state with the client.

LANGUAGES

English: B2

Ukrainian: Native
